DAVID AND GOLIATH DOT TO DOT

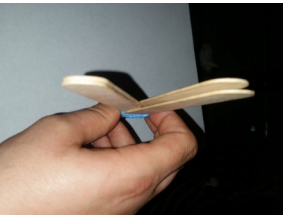

DAVID AND GOLIATH

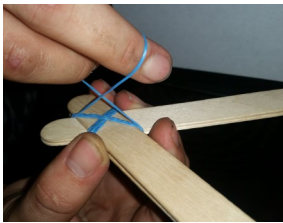

POM POM SLINGSHOT CRAFT

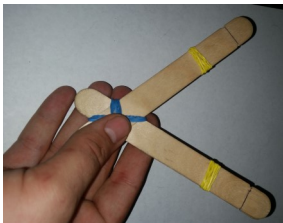

Stack all 4 craft sticks one on top of the other, lining up the dots (on the ends without grooves). Bind the sticks together using a small rubber band about 1 inch from the end. **Note:** Make sure sticks are even.

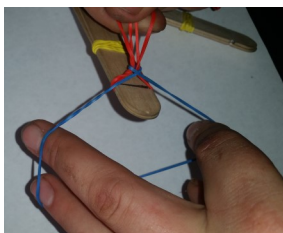

Separate the two inside and two outside sticks, to make a "V" shape. (**Tip:** Move the ends without the rubber band binding.)

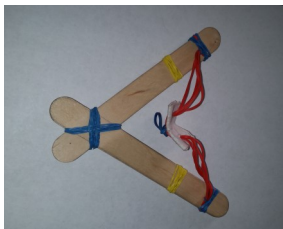

Add two small rubber bands **one at a time** vertically between the wedge at the bottom and top as shown.

Using 1 medium rubber band for each side, wrap the band around the lower groove/indentation until snug. This will hold the craft sticks together and strengthen the slingshot.

Thread a large rubber band through a small rubber band. Loop the same large rubber band around the upper groove at the end of one popsicle stick. **Here's the tricky part:** While holding the large bands in the indented area, bring the small rubber band close to the stick without overlapping it. Twist the small rubber band 180 degrees once (a half turn) then begin to wrap the stick, covering the large rubber bands. Repeat on the other side.

There you have it! Have fun with your pom pom slingshot!
